

Name	Dept Affiliation	Title of proposal	Topic of proposal
Brearley, Jackie	Veterinary Medicine	Development of online teaching material for Veterinary Clinical Skills	To create online teaching material linked to hands-on activities at the Clinical Skills Centre, allowing students instant access to refresher material when practicing at the Centre, and to reinforce memory and learning outside the Centre.
Hubbard, Katharine	Plant Sciences	Bridging the Gap: Augmenting student skills for Biological Sciences practical classes	To provide students with preparatory pre-lab material, creating resources that can be studied in advance to maximise time in the laboratory.
Jena, Raj	Medicine (Oncology clinical teaching)	ZEIT-GEIST: a new hybrid virtual reality environment for medical student teaching in Radiation Oncology	To create a virtual reality environment for students to take data for a known patient and explore effects of radiotherapy treatment in a 3D environment.
Kabla, Alexandre	Engineering	OpenLabTools.org	Expansion of a previously-successful project to create open source tools and tutorials to be used in experimental teaching
Ludlow, Amy	Law	Learning Together: a prison-based criminal justice educational programme	Piloting a prison-based programme in which Mphil students and offenders jointly study issues around offending/reoffending, and the nature of crime and punishment.
Moore, Andrew	Computer Lab	Practical Network Education: An aid to computer networking learning experience	To create a simulator platform to develop and assess virtual network environments.
Oppenheimer, Clive	Geography	Understanding volcanoes through data analysis and modelling	To create innovative practical exercises and online material to enable students to analyse and interpret real volcano monitoring data.
